HOPS

MARKET HOLD STEADY Chicago, Feb. 22.—Reports from the Pacific Coast state that there is enough business doing to keep the markets in the primary districts in a firm position. Recent transactions include several sales of Sonomas at 22c with better 15c. In Oregon 100 bales changed hands at 22c and in Yakima, Wash., general hundred bales were purchased at 20c to 22c, all these prices being net to growers. Besides these transactions between growers and dealers, a number of cars changed hands between dealers. Growers are firm in their views in regard to future values and are offering the remainder of their stock with a good deal of reserve.

Makes Pumping Up Tires Unnecessary

Chicago, Ill.—F. E. Hughes, Suite 138, 2512 Monroe, this city, has perfected a new air-tight valve cap that enables auto owners to pump up their tires once and never touch them again until punctured or worn out. Leading tire manufacturers, after thorough tests, have approved Mr. Hughes' invention and banished the old theory that air escapes thru rubber. One inflation lasts the life of a tire, and tire mileage is doubled. These caps retail for \$1.25 for set of five. The inventor wants agents and will send proof and samples free. Write him today.

BULL BRAND LAYING MASH - makes eggs. Only through furnishing hens with feed which will produce the whites and the yolks of eggs and at the same time supply bodily health can you get big production. Bull Brand Laying Mash with Dried Buttermilk supplies the whites and Bull Brand Scratch Feed supplies the yolks of eggs. And there is enough extra protein, fat, carbohydrates, ash and lime in these feeds to keep the hens constantly in the prime of condition. Because of these well-balanced qualities Bull Brand Poultry Feeds win many Blue Ribbons each year and help thousands of hens to big egg production. Ask us for feeding chart. For sale by P. N. LEWIS, Phone 57

Look beyond the price tag! Many things could be put together as a dairy feed that would cost much less than Larro. But feeding isn't a matter of price. It's a matter of results in relation to price. Larro is made from a formula that has been proven by many years of experiment and practical feeding tests. This formula never changes. Larro is also an absolutely uniform ration. No matter when or where you buy it, every sack is always the same. For this reason, wise dairymen who look beyond the price tag find Larro in reality the cheapest feed they can buy, because it puts cows on a profit-making basis and keeps them there—when inferior, low priced feeds fail. Your monthly feed bill wont be greatly reduced by the use of inferior feeds, either. Each of your cows will consume less than 2 tons of grain in a year so even if Larro sold at \$10.00 per ton more, it would actually cost you only \$1.65 extra per cow for a month and the increased profit made possible by its use will be much more than that.
